

Space Innovation Forum

11-12 March 2020 | Space Campus | Kiruna

The future business of micro launchers

The increasing demand for micro launchers presents a great business opportunity for Norrbotten and Sweden.

As we dedicate this Space Innovation Forum to learn about micro launchers, we have invited national and international cutting-edge companies to share their insights.

We're also excited to announce a 1-to-1 match-making session, where you'll get the opportunity to make new business contacts.

We will focus on how we can collaborate to develop the business opportunities around micro launchers, strengthen the space ecosystem and attract innovation, new establishments and investments.

Come join the conversation!

Find more info and sign up to attend at www.ritspace.se
